

Michael Elboateng Manu

Bartender Trainer | Aspiring Cybersecurity Professional

elboatengmichael@gmail.com | +44 7494 8837 | Leeds,UK | www.linkedin.com/in/michael-elboateng

PROFILE SUMMARY

Highly disciplined and analytical aspiring Cyber Security professional with a proven commitment to structured, continuous learning, currently demonstrating rigorous focus by dedicating an hour daily to mastering complex UK regulatory frameworks. Eager to transition transferable problem-solving skills into a dedicated security role, with a sharp focus on mitigating sophisticated network vulnerabilities and defending digital infrastructure against evolving cyber threats. Possesses a strong technical aptitude and the methodical mindset required to excel in fast-paced, high-stakes IT environments.

CORE TECHNICAL SKILLS

- Operating Systems & Infrastructure: Windows 10/11, Linux (Kali Linux, Parrot Security), Virtualization (UTM, Sandbox Environments).
- Networking & Tools: Cisco Packet Tracer, Network Protocols (TCP/IP, DNS, DHCP), Sysmon (Advanced Endpoint Logging), Wireshark, Telemetry Analysis.
- Cyber Security & Compliance: Incident Response, Penetration Testing, Systems Hardening, Indicators of Compromise (IoCs), SQL Injection, Data Governance (GDPR) Access Control (IAM).
- Languages & Software: Python, SQL, HTML, Microsoft Access, Excel, EPOS Architecture.

SELECTED TECHNICAL PROJECTS

Advanced Endpoint Detection & Sandbox Simulation | The Computing and IT Project (TM470)

- Situation: Standard corporate email gateways regularly fail to intercept highly tailored, AI-generated social engineering attacks, moving the defense perimeter to endpoint log telemetry.
- Task: Architected an isolated virtualization sandbox to simulate credential-harvesting attacks and map post-exploitation forensic markers without enterprise-grade security tools.
- Action: Deployed an isolated network environment using UTM, configuring a Parrot Security attacker node against a Windows 11 target. Utilized the Social-Engineer Toolkit (SET) to execute credential harvesting, while deploying Sysmon on the victim endpoint to capture deep system behavior, process creation, and network requests.
- Result: Isolated critical Indicators of Compromise (IoCs) and authored a Hardened Logging Guide and IoC Blueprint to optimize baseline endpoint visibility for resource-constrained organizations.

Enterprise Network Routing & Switching Lab | Cisco Networking (CCNA) Modules (TM257 / TM357)

- Situation: Modern enterprise networks require highly scalable, resilient, and secure architectures to prevent data broadcast storms and unauthorized cross-department access.
- Task: Designed, configured, and troubleshooted a multi-site enterprise network infrastructure using Cisco Packet Tracer simulations to ensure high availability and security.
- Action: Structured IPv4/IPv6 addressing schemes, implemented VLAN segmentation, and configured Inter-VLAN routing. Applied security hardening protocols including Access Control Lists (ACLs) to restrict traffic and diagnosed routing anomalies using CLI verification commands.
- Result: Successfully built a functional, secure network simulation optimizing data flow and restricting lateral movement possibilities across subnet boundaries.

WORK EXPERIENCE

Lead Bartender & Technical Trainer | Arc Inspirations (Banyan & Manahatta), Leeds

Apr 2020 – Present (Promoted/Transferred to Banyan Leeds in 2025)

- Acted as the first line of technical support for on-site Electronic Point of Sale (EPOS) systems running on Windows 10, troubleshooting and resolving OS and hardware anomalies during high-volume trading hours.
- Diagnosed and remediated local network connectivity issues on wireless PDQ card terminals and network printers, manually reconfiguring network protocols and interface settings when environmental factors caused device dropouts.
- Architected and executed structured technical onboarding and operational training programs across multiple corporate locations, ensuring 100% compliance with strict service and safety standards.
- Audited front-of-house operations and EPOS workflows, utilizing a methodical approach to root-cause analysis to fix live technical glitches without relying on delayed external IT support lines.
- Commended with a Quarterly Award for outstanding customer service, demonstrating elite communication skills and the ability to translate complex procedures to technical and non-technical stakeholders alike.

Data Entry Clerk

St Vincent's Centre, Leeds

Oct 2018 – Jun 2019

- Remediated data inefficiencies by migrating legacy client records into a structured Excel and Access infrastructure, reducing staff data-retrieval times.
- Enforced strict data confidentiality and access control by implementing password protection on shared files and restricting user access permissions to authorized personnel only.
- Maintained 100% compliance with GDPR guidelines, ensuring sensitive user data was processed, stored, and managed in alignment with standard data protection regulations.
- Provided direct technical support and digital literacy training to end-users, using clear, non-technical language to explain basic operating system navigation and build user confidence.

EDUCATION & CERTIFICATIONS

The Open University

BSc (Hons) Cybersecurity (*Expected Graduation: 2026*)

- **Key Modules:** Networking, Cybersecurity, Systems Penetration Testing, Information Security, Programming, Web Technologies.

Certifications Earned En Route:

- Diploma of Higher Education in Cyber Security (2025)
- Certificate of Higher Education in Computing and IT (2023)

Leeds City College Printworks

Pearson BTEC Level 3 National Diploma in IT (*2017 – 2019*)

GCSEs

English & Maths – Grade 4

Languages

English (Fluent) | Italian (Fluent)
